## Valuation \& Outlook

Titan management is focused on defending their market share in increasing competitive scenario.Management is ready to choose revenue growth over margins for near term. We believe this could weigh on the overall profitability in near to mid term.Companies which do not resort to $100 \%$ hedging policy on gold like Titan stand to benefit in the near term due to surge in gold prices, as they can undercut prices but still make the same margins due to rise in gold prices.Management commentary was weak this time \& they don't expect strong bounce back immediately. We believe with elevated PE multiple \& lower earnings outlook stock could see some correction in the near term.

Also number of weddings for FY25 will be key monitorable as FY23 had closer to 40 lakh weddings \& FY24 is expected to have 35 lac weddings, however due to higher price of gold in FY25 could slow down the overall growth momentum coupled with increased competitive intensity.

At CMP of Rs 3,514 the stock is trading at $65 \times$ FY26e expected EPS of Rs.54, we maintain our rating to HOLD with a target price of Rs.3,135 ( $58 \times 12$ Mnth Fwd PE multiple closer to mean)
