Q1FY26 Result Update | Refractories

Equity Research Desk

14 August 2025

Strong domestic show, Overseas operations under recovery

IFGL Refractories' Q1FY26 PAT was slighlty below our estimates on account of lower gross margins in overseas business, lower other income and higher tax rate. However the domestic business grew 30% YoY much ahead of our peers and the overseas business has turned EBITDA +ve (incl other income).

Key business highlights

- IFGL refractories reported a consolidated revenue growth of 9.5% YoY and 1.2% QoQ in Q1 driven by strong domestic performance growing 32% YoY & 5% QoQ. The refractories manufactured in India and exported saw a de-growth of 22% YoY and 6.4% QoQ
- European operations (-3% YoY, -6% QoQ) & American operations (10% YoY, +6% QoQ). Combined operations contributed ~38% of overall revenue.
- Indian Operations EBITDA margins at 13.67% & +0.74% for Overseas operations. Europe continues to face losses (~87Mn EBIT losses for Q1FY26)

Outlook:

- The company is targeting 15-20% CAGR in Standalone operations for the next 2-3 years before any new plants commence.
- USA Demand is strong, Europe Shefield Refractories and EL ceramics to perform much better than FY25, challenges remain in Germany operations however trials ongoing for alternate applications.
- Raw material costs currently stable, expect high cost inventory to be consumed by Q2, gross margins likely to improve from Q3 if prices sustain
- Targeting double digit EBITDA margins (incl other income) in FY26 (FY25 – 8.8%)

harsh.shah@dalal-broacha.com

Concall Highlights:

- Company reported highest ever quarterly revenue with domestic operations contributing 77% of standalone operations
- Gaining market share in domestic market by improving the performance of the products (same or better than peers), increasing the product offerings, focused marketing and without undercutting leading to onboarding new clients and increasing wallet share in existing customers.
- Total Refractory Management customers now at 22, earlier was around 14. Engaged in talks with large integrated steel plants
- New leadership team appointed to drive the non-ferrous segment, results to be seen in next few years
- Restructuring at Monoccon operations in terms of leadership team and product development, initial trials have received very positive feedback
- Opened wholly owned subsidiary in Australia to capitalise on the growth opportunity (new market opening)
- Technology transfer from Shefield to be completed by end of Q3FY26
- JV with Marvel should contribute from FY29, capex of 300crs
- New greenfield plant to start contributing from H2FY28, capex of 300-350crs

Valuations and Outlook:

The company has delivered over 20% CAGR in the Indian market since FY20, significantly outperforming peers. With additional casting flux and magnesia brick capacity coming online, coupled with its foray into the non-ferrous segment and a secured base of new customers, management anticipates strong growth momentum over the next couple of years—even without incremental capacity additions before FY27.

A further acceleration is expected from FY28 onwards, driven by the upcoming greenfield project in Odisha and the joint venture with Marvel. The company remains highly confident in sustaining 15–20% CAGR in its domestic business over the medium term, independent of new project contributions. Management is cautiously optimistic about a gradual recovery in overseas operations.

At CMP of 235, the stock is trading at 26x/13x FY26E/27E. We continue to remain optimistic about the company's mid-to-long-term prospects and believe the downside is very limited (available at 1x Price/sales). We maintain our BUY recommendation with a target price of Rs 338 based on a SOTP valuation methodology based on FY27E.
