Valuations

The bank's PAT is projected to grow at a 18% CAGR over FY25-28e, driven by the new management's ambitious targets, including product portfolio expansion, branch transformation, margin improvement, and renewed digital focus. These initiatives are expected to improve ROA from 1.2% in FY25 to 1.3% by FY27. ROE is also forecasted to rise from 13% to 14.9% during FY25-27.

CASA improvement is visible in this quarter, though sustaining this growth remains crucial. Under strong leadership, successful implementation of the roadmap could lead to a structural re-rating compared to the current valuation typically accorded to old private sector bank.

The stock trades at 1.9x/1.7x/1.5x on FY26e/FY27e/FY28e ABV. We are rolling forward our target price on FY28 estimates. NII grew by 9.1% yoy (6.3% qoq) due to moderated asset growth and margin expansion

- Quarterly reported margins improved by 14 bps qoq to 2.83% led by faster repricing of funding cost than assets yields, CRR cuts, reduction in the borrowing cost and improvement in the investment yield.
- Management highlighted that downward repricing of the term deposits is likely to continue for next 4-5 months time. Additionally, recent repo rate cut is yet to fully reflect in advances yields. Hence, with both downward repricing of the advances & deposits, margins are likely to remain at the current levels.
- Reported advances yields was down by 12 bps qoq to 8.74%, mainly due to impact of lending rate cuts & slowdown in retail loans.
- Reported cost of funds has dropped by 9 bps yoy to 5.5% which can be partially attributed to faster repricing of bulk deposits at lower rates (16% share, -3% qoq decline) and term deposits repricing. Going forward, CP/CD rates has fallen in line with improved liquidity & repo rate cuts, bulk deposits which contribute 17% of the overall deposits, should get reprice faster at lower rates resulting in lower funding costs. While at the same time, management would defend the current margins in the downward repricing of both advances & deposits

- Current account deposits reported strong growth of 31% yoy (savings deposits too grew by 16% yoy) - this remains one of the key strategies of the new management to focus on growth of CASA deposits. While total deposits growth was lower at 11.8% yoy/3.1% qoq to INR 2.98 trillion in Q3FY26

- **Margin Outlook**
 - The bank follows T+1 repricing policies hence 1/3rd of the adverse impact of -25 bps rate cut has played out in 3Q while the balance will play out in 4Q
 - Management highlighted that downward repricing of the term deposits is likely to continue for next 4-5 months time (~14 months from the beginning of the rate cut cycle). Additionally, recent repo rate cut is yet to fully reflect in advances yields. Hence, with both downward repricing of the advances & deposits, margins are likely to remain at the current levels.
 - Going forward, margin improvement will be one of the key drivers of the ROA improvement
- **Asset Quality**

 - MFI credit costs- The management expects the credit costs for MFI to continue trending downwards in Q4
 - As the management is aiming to grow the mid-yielding segment, credit cost is expected to be higher than the current levels in the medium term
 - Also, with the implementation of the ECL norms, credit cost is not expected to be adversely impacted
- **Business Growth**
 - The corporate loan growth of 8% may not be sustained current levels and might come down in the coming quarters
 - The bank is likely to grow loan book by 1.2-1.3x of the industry average growth for the period FY26
 - Structural changes in auto loans are likely to improve the loan growth going forward
 - The management is aiming to grow the mid-yielding segment faster than the high-yielding book. Current, high & very high-yielding book which includes personal loans & MFI – management is monitoring the stress before aggressively growing in this space.
